BOOK No. 2

## AMATEUR RADIO

# LOG BOOK

AMATEUR RADIO  
STATION

JYI

FROM APRIL 24 TO  
1970

PUBLISHED BY THE RADIO SOCIETY OF GREAT BRITAIN

## LOG KEEPING

Clause 6 of the Amateur (Sound) Licence states that:

(1) An indelible record shall be kept in one book (not loose-leaf) (in this Licence called "the Log") showing the following:

- Date
- Time of commencement of every call made from the Station (including the tests referred to in clause 4(2) hereof).
- Call signs of the stations from which messages addressed to the Station are received or to which messages are sent, times of establishing and ending communication with each such station, and the frequency (not frequency band) or frequencies (not frequency bands) and class or classes of emission in each case.
- Time of closing down the Station.
- The address of the temporary premises or the alternative premises or particulars of the temporary location when the Station is established other than as provided in clause 1(1)(a)(i) hereof.

All times shall be stated in GMT. No gaps shall be left between entries and all entries shall be made at the time of sending and receiving.

(2) If the Station is at any time operated by a person other than the Licensee (see clause 1(2)(c)(ii) hereof) the Licensee shall ensure that the Log is signed by that person with his full name, and that the call sign of the station which he is licensed to use, or (if there is no such station) the number of his Amateur Radio Certificate, is shown in the Log.

## PHONETIC ALPHABET

Appendix 16 of the Radio Regulations, Geneva, 1959, recommends the use of the phonetic alphabet shown below when the letters of a call sign are transmitted phonetically.

A Alfa	J Juliett	S Sierra
B Bravo	K Kilo	T Tango
C Charlie	L Lima	U Uniform
D Delta	M Mike	V Victor
E Echo	N November	W Whiskey
F Foxtrot	O Oscar	X X-Ray
G Golf	P Papa	Y Yankee
H Hotel	Q Quebec	Z Zulu
I India	R Romeo	

## Schedule to the Amateur (Sound) Licence A

Foot-note No.	Frequency Bands (In Mc/s) (See A below)	Classes of Emission (See B)	Power	
			Maximum D.C. Input Power (see C and D)	Radio Frequency Output Peak Envelope Power for A3A and A3H emissions only (see D)
1 and 5	1.8 - 2		10 watts	261 watts
2	3.5 - 3.8			
	7 - 7.10 14-14.35 21-21.45 28-29.7		150 watts	400 watts
1 and 3	70.025-70.7	A1, A2, A3, A3A, A3H, A3J, F1, F2, and F3	50 watts	1333 watts
1, 4 & 6	144 - 145			
6	145 - 146			
1	425 - 429			
1	432 - 450			
1	1215 - 1325			
1	2300 - 2450		150 watts	400 watts
1	3400 - 3475			
1	5650 - 5850			
1	10000 - 10500			
	21000 - 22000			
1	2350 - 2400		25 watts	
1	5700 - 5800	P1D, P2D, P2E, P3D and P3E	mean power and 2.5 kilowatts peak power	
1	10050 - 10450			
	21150 - 21850			

A. Except as provided in Footnote 6 below, artificial satellites may not be used by stations in the Amateur Service.

### Footnotes

- This band is allocated to stations in the amateur service on a secondary basis, on condition that they shall not cause interference to other services.
- This band is shared by other services.

This band is available to amateurs *with further notice* provided that (i) only the frequency 70.375 Mc/s - 25 Mc/s shall be used for the purposes mentioned in Clause 1(1)(c) of this Licence; (ii) frequencies between 70.170-3 Mc/s inclusive and 70.5-70.7 Mc/s inclusive shall not be used on the North West side of the Lane Birth of Lorne to the Mooka Birth; and (iii) use by the Licensee of any frequency in the band shall cease immediately on the demand of a Government official.

4. The following spot aeronautical frequencies must be avoided whenever the band is used: 144.0, 144.09, 144.118, 144.27, 144.36, 144.45, 144.518, 144.61, 144.72, 144.81 and 144.9 Mc/s.

5. The type of transmission known as Radio Teletypewriter (RTTY) may not be used in this band.

6. In the band 144-146 Mc/s artificial satellites may be used by stations in the amateur service.

B. The symbols used to designate the classes of emission have the meanings assigned to them in the International Communication Convention. They are:

### Amplitude Modulation

A1. Telegraphy by on-off keying without the use of a modulating audio frequency.

A2. Telegraphy by on-off keying of an amplitude modulating audio frequency or frequencies, or by on-off keying of the modulated emission.

A3. Telephony, double sideband.

A3A. Telephony, single sideband, reduced carrier.

A3H. Telephony, single sideband, full carrier.

A3J. Telephony, single sideband, suppressed carrier.

### Frequency (or phase) Modulation

F1. Telegraphy by frequency shift keying without the use of a modulating audio frequency, one of the two frequencies being emitted at any instant.

F2. Telegraphy by on-off keying of a frequency modulating audio frequency or on-off keying of a frequency modulated emission.

F3. Telephony.

### Pulse Modulation

P1D. Telegraphy by on-off keying of a pulsed carrier without the use of a modulating audio frequency.

P2D. Telegraphy by on-off keying of a modulating audio frequency or frequencies or by on-off keying of a modulated pulsed carrier - the audio frequency or frequencies modulating the amplitude of the pulses.

P2E. Telegraphy by on-off keying of a modulating audio frequency or frequencies or by on-off keying of a modulated pulsed carrier - the audio frequency or frequencies modulating the width (or duration) of the pulses.

P3P. Telephony, amplitude modulated pulse.

P3J. Telephony, width (or duration) modulated pulses.

C. D.C. input power is the total direct current power input to (a) the anode circuit of the valve(s) or (b) any other device energizing the aerial.

D. As an alternative for A3A and A3J single sideband types of emission, the power shall be determined by the peak envelope power (p.e.p.) under linear operation. The radio frequency output peak envelope power under linear operation shall be limited to 2.667 times the d.c. input power appropriate to the frequency band concerned. This column gives the maximum power determined by this method which may be used.
